MESSAGE FROM THE CHAIR

Welcome to DisCon III, the 79th World Science Fiction Convention. We are all so pleased you’ve joined us to celebrate fandom here in Washington, D.C. Worldcon is run by and for fans - and it’s people like you who make all of this possible. Whether you are readers, gamers, film aficionados, or otherwise involved in speculative media, you are the ones who make Worldcon “Worldcon.”

As we’ve been preparing to host you, a single word continues to crop up in my mind: terroir. This is a word that comes from wine-making and it refers to the expression, through the wine, of a specific location and time. Worldcon moves from location to location and ideally, each has the terroir of its host city. Washington, D.C. is a city steeped in history, both within fandom and without.
Not everyone here is a local, however. Some of you have traveled to join us today, and others of you are joining us online. Fans from around the world are truly putting the “World” in Worldcon. You’re chatting with your friends on Discord, Slack, or Zoom while tuning in to panels and sharing thoughts about the media you love.

We’re here to celebrate you. We’re here to celebrate the media you love, the writers and creators who you’ve chosen to honor in the Hugo Awards, and -- most of all -- we’re here to celebrate the particular community you’ve built together, collectively. Fandom is not about any one individual, but instead about individuals coming together to create a community that is greater than the sum of its parts.

You are why we are here.

Have an absolutely wonderful Worldcon.

- Mary Robinette Kowal, 2021

CODE OF CONDUCT

DisCon III aims to build a community for all fans, and Codes of Conduct (CoC) help to make an inclusive community. With that in mind, please take a moment to review our Code of Conduct and Anti-Harassment Policy.

Codes of Conduct and Anti-Harassment Policies enable, guide, and encourage safe and secure relationships between convention attendees. They help to make conventions a safer space by discouraging anti-social behavior and helping everyone to feel comfortable.

This CoC applies to all DisCon III attendees – which includes Committee, staff, volunteers and members, and all others trading, exhibiting and otherwise participating. We will also expect those working for the hotels where our activities are taking place to act, and to be treated, in line with the principles of this CoC.

LISTENER TEAM

You will find references to our Listener Team throughout this CoC. The Listener Team is a group of people who hold the DisCon III community accountable to our commitment to abide by the Code of Conduct. This team handles reports about Code of Conduct issues and determines how to respond to incidents, escalating to senior staff as appropriate.

CREDIT WHERE CREDIT IS DUE

This Code of Conduct is significantly based on Dublin 2019: An Irish Worldcon’s COC, which was loosely based on Geek Feminism’s example anti-harassment policy, created by volunteers.
HOW CAN I HELP?

• Read and follow this Code of Conduct. Ask your friends to read it as well.

• Support others – if you see someone who looks like they need help, ask if they’re okay or possibly alert a DisCon III volunteer.

• Ask first! The easiest way to avoid issues is to check before doing something, and it only takes a second.

• Remember that the attendees of DisCon III come from all over the world. Cross-cultural misunderstandings can easily happen, so consider this in your humor and interactions, both online and in-person.

OVERARCHING EXPECTATIONS

Everyone involved with DisCon III is expected to show respect towards the convention attendees, venue staff, the general public, and the various communities associated with the convention. This is a family-friendly convention; children will be present at many events and in open spaces, so please consider this in your conduct.

ANTI-HARASSMENT POLICY

DisCon III is dedicated to providing a harassment-free convention experience for all attendees, regardless of ethnicity, gender identity and expression, sexual identity or sexual orientation, neurodiversity, disability, physical ability or appearance, race, age, religion, or fiction/fandom preferences (this list is not exhaustive).
We do not tolerate harassment of convention attendees in any form. Behavior that will be considered harassment includes, but is not limited to:

- Intimidation, stalking, or following
- Unwelcome physical contact
- Unwelcome sexual attention
- Comments directly intended to belittle, offend, or cause discomfort including telling others they are not welcome and should leave
- Individually photographing or videoing members without their consent
- Treating cosplay/costumes as consent for unwanted contact or interaction
- Sustained disruption of talks or other events
- Sexually graphic or otherwise inappropriate images in public spaces
- Persistent and deliberate misgendering of other people
- Attempts to weaponize the Code of Conduct
- Advocating for, or encouraging, any of the above behavior

We require attendees to follow the CoC in online interactions with the convention (including the volunteer mailings, wiki, and other online facilities), at all convention venues and convention-related social activities. Attendees who are asked to stop any harassing behavior must comply immediately.
ANTI-RACISM POLICY

Racism is on the rise across all sections of society -- in sports and the media, in politics, and in our own fandom communities. DisCon III is committed to being as close to oppression free as possible, and central to this is our policy on racism, including prejudice, bias, the expression of privilege, aggressions, and microaggressions. This includes contributions made in discussion sessions and also things said to and about other DisCon III attendees.

At DisCon III we strive to ensure no one is talked over, ignored, or dismissed, and we are committed to making DisCon III as accessible as we can to people from all racial and ethnic backgrounds. Problems non-white attendees of fandom events often reference include, but are not limited to:

• Having their lived experiences dismissed
• Being expected to be an authority on non-white characters in various fandoms
• Being talked down to or assumed to be less knowledgeable about topics being discussed
• Having their cosplay negatively critiqued without being asked
• A presumption by some members of fandom that people of color do not belong in fandom and that they should not be centered in storytelling
• The use of Social Justice Warrior or SJW as a pejorative term meant to demean or belittle the idea of diversity and inclusion in fandom and storytelling
• The use of social media to target people of color and allies for harassment and abuse as an outgrowth of their participation in panels, discussions, or when commenting on their participation in fandom
• Being targeted in person or through social media with acts of aggression, harassment, or retribution for calling out harassers and abusive behavior

This sort of behavior will not be tolerated at DisCon III.

REPORTING ISSUES

If someone has harassed you or breached this CoC in any way, or if you have witnessed or become aware that harassment or a CoC breach has taken place, please ask that person or persons to stop – as long as it is safe to do so and if you feel comfortable enough to make the request. To help us identify patterns of behavior and possible repeat offenders, we would be grateful if you would also report the harassment as set out below.

If you do not want to speak to the person(s) directly, or if you engage with them and the harassment or CoC breach does not stop, please report the issue as soon as possible to one of our volunteers or a member of the Listener Team. There will be a Listener Desk at DisCon III, a Listener Team contact phone number with your registration materials, and you can also ask any member of DisCon III staff to call a Listener. Alternatively, you can report by email to coc@discon3.org. This address will be continuously monitored by our Listener Team before, during, and after DisCon III.

Harassment and other Code of Conduct violations reduce the value and enjoyment of DisCon III for everyone – we want you to be happy at our convention, so please do speak to us if needed.
WHAT WILL HAPPEN IF I MAKE A REPORT?

When taking an in-person report, our Listener Team will first ensure that you are safe and cannot be overheard. They may involve other event staff to ensure your report is managed properly. Once you are safe, we’ll ask you to tell us about what happened, and what you would like to happen next. We understand this can be upsetting, but we’ll handle it as respectfully as possible and try to support you. You can also bring another person to support you if you wish.

If you submit a report by email, our Listener Team will respond to you as quickly as possible, and proceed at their discretion, based on the content, context and wishes expressed in your email.

However you choose to report an issue, you won’t be asked to confront anyone. We will do our best to protect your identity if we take action as a result of your report. Details of your complaint will only be disclosed to other members of the Listener Team or Committee members who are dealing with it. We will keep you advised of the progress we’re making in handling the issue, and of any action we decide to take. We will take into account your views when deciding on that action. However, please be aware that, if you report a serious criminal matter, or we believe that you or someone else may be in danger, we may need to contact the police. We would take into account any concerns you may have around involving them.

The DisCon III Team has the right to take any actions needed to keep our Worldcon a welcoming environment for all attendees. Measures taken may include warning the offender or taking any other action the team considers necessary, up to and including expulsion from the convention with no refund, at our discretion.
If you wish to take further steps following your report and our response, our team will be happy to help you contact hotel/venue security, local law enforcement, local support services, or otherwise assist you to feel safe for the run-up to and duration of the event. Above all, we want everyone to feel valued, safe, and included at our convention!

ADDITIONAL POLICIES

WEAPONS

Do not bring weapons to DisCon III, even if you have a license to carry it.

- Real weapons are forbidden. This includes but is not limited to firearms, laser weapons, electroshock weapons, missile weapons, throwing weapons, clubs, and any sharpened blade bigger than a folding pocket knife. DC law does not permit the carrying of firearms.
- Practice weapons are forbidden. Wooden swords can kill – ask anyone with sword training.
- Prop weapons that can be easily confused with a real weapon are forbidden. DisCon III’s Operations Division is the final judge in deciding whether a prop weapon will be banned.
- Items that might be used as weapons, such as staffs and walking sticks, are not banned. However, anyone who uses anything in a threatening manner may have the object classified as a weapon, when it will be either seized or impounded for the rest of the convention. Anyone who refuses to comply may be dismissed from the convention without refund.
• If the program includes a weapons demonstration, the weapons used must be approved in advance by the head of the Program Division. These weapons must be wrapped securely when transported to and from both the Green Room and the demonstration room before and after the demonstration.
• For the Masquerade, any questionable prop weapons must be approved in advance by the Masquerade Director. These weapons must be wrapped securely when transported to and from the Green Room before and after the Masquerade.
• Wearing a hall costume does not entitle you to carry a weapon, real or fake. See event-specific policies.
• Weapons may be available for purchase in the Dealers’ Room. They must be wrapped securely in transit to your room or vehicle.
• Some law enforcement officials are required to carry a weapon at all times. When questioned about the weapon, they need only present official identification and explain this requirement.

BADGES

Wear your badge where it can be seen at all times in convention space. This convention is a membership-only event, and your badge is your admissions pass to convention areas and activities. Badges may not be shared under any circumstances. A badge is valid only for the person to whom it was issued.

SIGNS

Please post signs only in designated areas. Use removable painters tape only. Do not affix anything to the walls of the hotel, to the
PRIVACY

We collect your information to allow the convention committee and staff to provide you better services. Your personal information will be kept strictly confidential. We will ask for your consent before sharing your information with anyone outside this convention committee.

We must retain records relating to member registration and financial transactions. Other than this obligation, at a member’s request, we will remove any information about the member from all online systems after the convention.

Member financial payment information, e.g. credit card numbers, does not come to us through online payment systems (PayPal and Square); such information is handled exclusively by the online payment service. Credit card information submitted physically (through a signed credit card slip) is kept secure and is not shared with anyone or used for any purpose other than the membership or other transaction requested by the member.

The Baltimore-Washington Area Worldcon Association, Inc. (BWAWA) is the sponsoring organization for DisCon III. For DisCon III, BWAWA observes the laws of the United States, the District of Columbia, and the by-laws of BWAWA. Within the practical limits and resources of a non-profit volunteer organization, we will observe international best practices for privacy as well as transparency in relation to information storage and privacy policies.
COVID-19 POLICY

Worldcon is more than just a convention: it is a community. As such, we all have a duty to protect each other and to protect our friends, families, and peers. This has been true from the very first Worldcon in 1939, and it remains true today.

At DisCon III, we aim to continue this tradition of providing a welcoming, supportive, and safe environment for all members of the science fiction and fantasy community. We have a responsibility to provide and maintain a safe convention experience for everyone from members and volunteers to staff and hotel employees and even to the community at large. We can’t protect from every danger, but we can do our best to protect from infectious conditions that are lessened by effective vaccination programs.

This policy is intended to comply with all applicable laws. It is based upon guidance provided by the US Centers for Disease Control and Prevention (CDC) and created in consultation with epidemiologists who are familiar with conventions and fandom. We will continue to follow developments, revise the policy as necessary, and communicate any updates or changes with members.

The following is the current official DisCon III Policy related to preventing the spread of COVID-19.

TRACKING COVID-19 EXPOSURE

To be alerted of possible COVID-19 exposure from the convention, we encourage Android users to install the DC Covid Tracker app. iOS users can enable exposure notifications and will not need to download this app.
PROOF OF COMPLETED VACCINATION (REQUIRED)

To attend any aspect of DisCon III in person, members and guests of DisCon III must be fully vaccinated against COVID-19 before the convention with a course of vaccination approved for human use as a COVID vaccine in the country in which the vaccine was received, including authorization for emergency use.

This means you must have received all required COVID vaccination doses no later than 14 days prior to the day you arrive at DisCon III to allow them to reach full efficacy before arrival. For people arriving on Wednesday December 15th, that would be December 1st. The date of vaccination will be confirmed as part of the pre-Registration vaccination check.

Each such person must present proof of vaccination, and attendees over the age of 18 must show a photo identification matching the name shown on the proof of vaccination. There are no exceptions.

MASKS MUST BE WORN (REQUIRED)

COVID-19 vaccines are an important tool to help stop the pandemic, but they don’t mean we can stop taking all precautionary measures. Properly worn masks covering nose and mouth are required for all convention members and guests in all convention spaces, except in designated areas when actively eating or drinking. Masks may be lowered, briefly, in other areas to sip drinks as needed.

Failure to comply is a violation of DisCon III rules and may be subject to disciplinary action. Clear masks will be provided to facilitate accessibility to panelists, event participants, and certain staff and volunteers in key positions.
ACCESSIBILITY

Accessibility Services will be available to anyone who needs assistance during the entirety of DisCon III. Our team is experienced in working at conventions, serving a variety of disabled groups. We will also have trained volunteers to assist as needed.

The fastest method of reaching us during the convention is by visiting the staffed desks (see below). You can also email access@discon3.org and one of our staff members will respond as quickly as possible. We will check email regularly during the convention. We will have a radio and can be reached this way by speaking to any member of staff with a radio.

SERVICES AVAILABLE

EVENTS + PROGRAMMING

Stickers

• Anyone who requires Accessibility Services will be given a sunflower sticker for the back of their convention badge. No declaration of disability or doctor’s note is needed to receive this: anyone who self-identifies as needing services is welcome to request one.

• Show this sticker to DisCon III volunteers when requesting accommodations. No staff members need to know what disability a member may have, only what services are needed. If any volunteer asks for proof of disability, please notify Accessibility Services staff.
**Accessible Seating**

- In the Regency Ballroom and Palladian Room, seating is available for mobility device users to remain in their chairs, along with companion seating. End-of-row seating will be marked off for those who need it, but may be released to the general public within 15 minutes of an event starting.
- Other rooms will have accessible seating as well, in lower quantities. DisCon III volunteers will ensure seating is made available to the best of their ability. If you have any questions, please contact Accessibility Services.
- Members needing accessible seating may ask a member of staff for entry to any event space (including panels) prior to an event beginning. If there is a line to enter, members should notify a nearby volunteer that they need early admission, a chair for the line, or other accommodations as needed.

**ASL Interpreting**

- Interpreters will be provided at the Opening Ceremonies, Masquerade, Hugo Awards Ceremony, and Closing Ceremonies. There will be interpreters available upon request for other events, including the WSFS Business Meeting.
Captioning

• Live CART captioning will be provided for the WSFS Business Meeting, Opening Ceremonies, Masquerade, Hugo Awards Ceremony, and Closing Ceremonies. Live CART captioning will also be provided for approximately half the in-person panels, and some virtual panels. Where live CART captioning is not possible for virtual panels, the built-in Zoom auto-captioning will be used.

Mobility Device Parking

• If you do not wish to take your mobility device into a programming room with you, you may park it either in the back of the room or the hall outside, unless doing so will block more than 1/4th of the width of the hallway.

• Please note that the convention will not be offering ANY overnight parking, secured or otherwise, for those staying off-site. We simply do not have the space to do so.

HOTEL

Accessible Routes in the Hotel

• The hotel might best be described as a maze of twisty little passages. We have done our best to provide a map of accessible routing (available online and at the Accessibility Desk), and to post signage to assist with routing. Note that, at times, two elevators may be needed to get between rooms, or an elevator and a chair lift. In some cases, the necessary elevator may be in the opposite direction of the room you want to reach. Although all rooms are accessible, routing may at times be difficult. We are happy to help explain routing to the best of our ability.
Mobility Device Rentals

- All rentals should be arranged directly with Scootaround, which will drop off at and pick up from the Omni Shoreham. Attending members have access to a discounted rate; see the member website or contact Accessibility Services staff located in the Omni Shoreham lobby. In case of damage or other need to swap devices, Scootaround will be able to provide a replacement quickly; please see our staff if this is needed, so we can ensure your convention proceeds as easily as possible while you wait for a replacement.

Priority Use of Elevators

- The hotel’s elevators are small and we ask all members to allow those with accessibility needs to go first. Signs will be posted as a reminder and we will provide staff if needed during peak times. If you have an invisible disability, please ask others waiting for elevators to allow you to go first. If you need support with this, please contact our team. If you encounter other issues with priority use of elevators, please ask our team for assistance as well - we will work with other con staff and members to make sure you have access to what you need.

Seating in Hallways

- As some members may need to sit periodically when walking long distances, we will have seating in hallways. While everyone is welcome to use this seating, we ask all members to please respect the needs of those who are less able to stand and walk, and allow them to take a break when traveling through the hotel.
QUIET SPACE
The Quiet Space (Governor’s Boardroom) is intended to support members seeking a space to calm down and reduce sensory overload. There will be comfortable seating and basic activities such as coloring books, tissues, and water.

**Quiet Space Hours:**
Wed/Thurs/Fri/Sat .................. 10:00 AM - 10:00 PM
Sunday .................................. 10:00 AM - 4:00 PM

To ensure everyone has the opportunity to enjoy the Quiet Space, we ask that conversations be kept to a whisper and minimized as much as possible. Phone calls, if necessary, should also be kept to low volume. This is not a space for sleeping, gaming, or other activities that could interfere with someone else’s peaceful enjoyment of the Quiet Space. Complete rules will be posted both inside and outside the room.

Staff will check on the Quiet Space periodically to resupply as needed, but members are asked to let staff know if there are any shortages or incidents that need staff attention beyond regular checks.

STAFFED ACCESSIBILITY DESK
The Accessibility Desk is located in the lobby. There will also be a secondary desk near Registration during peak registration times.

**Accessibility Desk Hours:**
Tuesday .......................... 2:00 PM - 8:00 PM
Wed/Thurs .................. 8:00 AM - 8:00 PM
Fri/Sat .................. 8:00 AM - 6:00 PM
Sunday .................. 10:00 AM - 2:00 PM
ANIMALS AT DISCON III

Service Animals

• Service Animals are welcome in all areas of DisCon III, without exception.

• Under the ADA, a service animal is defined as a dog that has been individually trained to do work or perform tasks for an individual with a disability. The task(s) performed by the dog must be directly related to the person’s disability.

• Note that the ADA permits questions about the task(s) a service animal is trained to perform, but does not allow questions about the handler’s disability.

All Other Animals

• Animals that do not meet the ADA-protected definition of Service Animals including, but not limited to, Emotional Support Animals (ESA), are not permitted in convention-designated spaces of the hotel at any time.

• The hotel permits ESAs in private hotel rooms, though they do charge fees for their presence. There is no waiver of fees for members of the convention.
TRANSPORTATION

WMATA MetroAccess

MetroAccess is a shared-ride, door-to-door, paratransit service for people whose disability prevents them from using bus or rail. Visit www.wmata.com/service/accessibility/metro-access for more information.

Reach A Ride

Reach A Ride is an online search engine for specialized transportation provided by both private and public entities in the National Capital Region. It is hosted through the Metropolitan Washington Council Of Governments. Visit reacharide.org for more information.

Information About Metrorail

Metrorail is the subway system in Washington, DC, and is operated by WMATA. Always check the website for operating hours and service alerts before you head out. Fares on Metrorail are both time- and distance-based. A short trip during non-peak times that travels only a few stations down the line will cost $2.00 USD. A long trip during peak times can cost as much as $6.00 USD. Each passenger must have their own hard plastic farecard or their own smartphone with the WMATA SmarTrip app installed and be logged in as a unique user.

The closest Metrorail is the Woodley Park-Zoo station. The distance to get into the station varies depending on the need for accessibility. The shortest distance from the station escalator to the hotel is 250m and includes seven steps, or 320m with no steps. If using the elevator, the route is 375m and step-free. Please see the DisCon III Accessibility Guide online for directions and photos.
**SPECIAL MENTIONS**

**KAFFEEKLATSCHES**

Join a small, informal discussion group with a program participant -- an author, artist, astronaut, musician, or fan! Kaffeeklatsches are happening all through the convention. Sign up for a kaffeeklatsch and meet someone interesting!

Signup sheets for kaffeeklatsches will be at the Info Desk (Main Lobby) a day or a few hours before each event.

**STROLL WITH THE STARS**

Thurs/Fri/Sat | 9:00 AM - 10:00 AM | Hotel Lobby

Start your mornings with a stroll! Meet up with facilitator Debra Nickelson at 9 AM in the lobby of the hotel for the now-traditional morning stroll.

**SIP WITH THE STARS**

Wed/Thurs/Fri | 7:00 PM - 8:00 PM | Robert’s Private Dining Room

Come hang out with published writers, critics, and convention veterans -- a great way to make new friends and get the vibe of the con! Bring your own drinks.

**FILK**

Filk, or science fiction folk music, is truly the music of our tribe! Join us for our Wednesday filk singalong, or swing by one of our open filk rooms Wednesday through Saturday.

All voices and all genres of music are welcome. You won’t know if you’re a filker until you try!
**VOLUNTEER!**

Help us build DisCon III! Volunteering is a fun and rewarding way of contributing to the community. Come find out more about volunteering possibilities at the Volunteer Desk in the Executive Room, right next to Registration.

Everyone who volunteers twelve or more hours receives a free, exclusive t-shirt as another way to thank you for your help!

**PARTIES**

Take part in a long-running Worldcon tradition! Parties will be hosted by various groups and delegations during each night of DisCon III. This year, we will have virtual parties in addition to our usual room parties!

Please keep in mind that alcohol will not be served to anyone under the age of 21, and controlled substances and smoking are not allowed.

Check out the party board in the Exhibit Hall to find out what’s happening!

P.S.: It’s not too late to throw your own party!

See [https://www.discon3.org/party-faq/](https://www.discon3.org/party-faq/) for more info.
EVENTS

OPENING AND CLOSING CEREMONIES

Come join us for the official start and end of DisCon III, the 79th World Science Fiction Convention!

**Opening Ceremony** .......... Wednesday 4:00 PM, Regency Ballroom

**Closing Ceremony** .......... Sunday 1:00 PM, Regency Ballroom

MASQUERADE

Friday | 8:00 PM - 11:00 PM | Regency Ballroom

The Masquerade is a formal presentation by costumers to the general convention audience in full theater style. After the costumes have been presented, Raqs Geek will be performing for half-time while the judges deliberate. Awards are presented after halftime.

Come join us for a fun evening of costumes that celebrate the fandom with fashion and flair! Doors open at 7:30 PM.

WSFS (WORLD SCIENCE FICTION SOCIETY)

WSFS is the World Science Fiction Society, an unincorporated literary society, and Worldcon is the annual convention of WSFS. The membership of WSFS is everyone who is a member of the current Worldcon, so if you are a member of DisCon III, you’re a member of WSFS this year.

The three things defined in the WSFS Constitution (printed in the souvenir book) are what technically make this a Worldcon: **giving out the Hugo Awards**, **picking the site of the Worldcon two years hence**, and **holding the WSFS Business Meeting**.
HUGO AWARDS CEREMONY

Saturday | 8:00 PM - 10:30 PM | Regency Ballroom

The members of DisCon III nominated works for the Hugo Awards and then voted on them to select what they think are the best works of the past year. The results will be announced at the Hugo Awards Ceremony.

Join us for this most iconic event Saturday evening in the Regency Ballroom! Doors open at 7:30 PM.

Alternative places to watch the Hugo Awards Ceremony live:

Blue Room: Hugo Watch Party with Bar
Diplomat Ballroom: Quiet Hugo Watch Party
Online: discon3.org

2023 WORLDCON SITE SELECTION (EXHIBIT HALL)

Every voting member (including attending, supporting, virtual, and other classes with voting rights) has the right to vote on where the Worldcon will be held two years from now. Unlike some organizations with a Board of Directors that decides where their annual convention will happen, WSFS puts the decision in the hands of the members.

Every year, different groups “bid” for the right to host Worldcon. During the convention, you will see different groups who are bidding for future Worldcons sitting at information tables and hosting parties where they hope to persuade members that their bid is the best and that you should vote for them.

Members vote before and during Worldcon. This year, the polls close on Friday evening at 6 PM. The results of the voting will be officially announced at the WSFS Business Meeting on Saturday.
WSFS BUSINESS MEETING

Thurs - Sun | 9:30 AM - 12:30 PM | Palladian Ballroom

The WSFS Constitution includes the rules for the Hugo Awards, Site Selection, and how to change those rules. The rules are changed by the Business Meeting.

Every attending member of DisCon III may attend the Business Meeting, debate changes to the rules, and vote on them. In general, changes have to be adopted by the vote of the Business Meeting at two consecutive Worldcons. This year, the Business Meeting will vote on whether to ratify changes adopted in previous years, after which the members will consider new proposals. If you’re an attending member of DisCon III, you can attend this meeting and get involved in the “Town Meeting” of the World Science Fiction Society.

Due to constraints on space and time this year, the Business Meetings on Thursday through Saturday must adjourn no later than 12:30 PM. Each day’s meeting will start at 10:00 AM sharp. Arrive early to collect and read papers and to hear announcements that will be made before the meeting.

WORLDCON CHAIRS PHOTO SESSION

Each year, the past (and future) Chairs of the Worldcon traditionally gather for a photo/video session. This year, that gathering is scheduled for Sunday at 9:30 AM in the Palladian Room, just before the WSFS Business Meeting. If you’re a Worldcon chair, please be there for the photo. If you want to photograph Worldcon chairs in their natural habitat, please come and bring your camera.

FANZINES AND META FANDOM
4:00pm | Kress | Panel
Fanzines have been a vital part of science fiction and fantasy from the beginning of modern genre fiction in the 1930s. They provide a record of friends, feuds, fashion, and fascinations. Periodically their demise is predicted, but they are still going strong, drawing in new participants and evolving along with fandom. This is a chance to talk to current and previous Hugo nominees about why they produce fanzines.

Fan Interest, Publishing
Alasdair Stuart (moderator), Cheryl Morgan, Olav Rokne, Marguerite Kenner, Ira Alexandre, Chris Garcia

SF SINGALONG
4:00pm | Cabinet Room | Participatory Event

FUTURE MEAT
5:30pm |
Congressional Room (A&B) | Panel
What does the future hold for carnivorous foodways as factory farming becomes less and less sustainable and more socially unpopular? Is the future cloned meat, vat steaks, cricket burgers, or fungus-based "chicken?" Are we growing past the need to refer to products as meat substitutes? Can we trust the companies which produce them? What are the ethical implications?

ASSISTIVE TECHNOLOGIES
7:00pm | Kress | Panel
The vast majority of the world’s population uses some kind of prosthetic or assistive device, from glasses, to mobility aids, to those jar-opening doohickies. How should they change our conceptions of disability and what using a prosthetic device really means? What bleeding-edge assistive technologies are out there right now that may seem like science fiction? Do engineers overthink it, and are some technologies impositions. And when is simpler, better?
Science
Ada Palmer (moderator), Elsa Sjunneson, Christine Taylor-Butler, Avani Wildani

BREAKING A STORY, HOLLYWOOD-STYLE
7:00pm | Older | Panel
In Hollywood, "breaking a story" means listing each scene in a story and arranging them in order for maximum dramatic effect. This panel will discuss how to apply this technique to novels and other narratives.

TV & Film, Writing
Rebecca Roanhorse (moderator), Sumiko Saulson, Nikhil Singh

CONCERT: AMY MCNALLY & RHIANNON’S LARK
7:00pm | Calvert Room | Concert
Amy McNally is that chick in a skirt and no shoes who sits on the floor with a violin and a stash of Pixy Stix. Yeah, that one, with the hair. She’s been hanging around jam circles like that for 20 years and playing fiddle for over 30 years now. Playing with multiple bands, singing with Lady Mondegreen, performing guerrilla accompaniment, and on recordings with assorted musicians and rogues, she does folk, Celtic, and historical music too, but considers herself a filker first.

Have you ever wanted to hear a Disney princess singing about the things you love—board games, ninjas, and krakens? Rhiannon’s Lark is happy to make your wish come true. This geek-goddess-girl tackles everything from T. Rex to moral dilemmas with insightful lyrics, gorgeous vocals, and gentle humor.

Music

VIEWING DISABILITIES THROUGH A HISTORICAL LENS
7:00pm |
Congressional Room (A&B) | Panel
Crude conceptions of disabled people abound in shallowly-written historical fantasy and popular imagination, but how was disability actually treated in historical cultures around the world? Our panel of archaeologists, anthropologists, historians and other experts sheds a modern, well-researched light on this oft-stereotyped area.
Anthropology, Archaeology, History
AJ Odasso (moderator), Mari Ness, Gillian Polack, teri.zin, Leigha McReynolds

HOW MAGAZINES ARE CHANGING
8:00pm |
Congressional Room (A&B) | Panel
Twenty years ago, a new age of internet magazines started rising alongside the print favorites. Now there are so many different ways to broadcast, produce, and consume short fiction. How are magazines changing to reflect that? We’ll look at how everything has changed over time, from what stories are popular to delivery methods to submissions rules and processes, and speculate about what may be coming next.

Really Weird Science: An introduction to Real Quantum Computing
Kevin Roche, Advisory Engineer-Scientist, Quantum Ambassador, Qiskit Advocate, IBM Research Almaden

The hype around Quantum Computing makes it hard to tell what is real and what is marketing. Kevin will try to dispel those clouds of uncertainty, starting with an introduction to the weird science that enables this new technology, and demonstrating how you can try out real quantum computers yourself (for free!) on the IBM Quantum Labs website. This presentation is intended for an interested audience with any level of technical background (no fancy mathematics required!)

SMALL READERS, BIG ISSUES: MG AND YA FICTION
11:30am | Calvert Room | Panel
Middle Grade sf, fantasy and horror works with the hopes and fears of the young; it explores moral and ethical dilemmas. Some of these are interpersonal issues, but many are about the way we treat the world around us, and how it treats us. Our panellists will discuss the most challenging YA fiction in our field and how it responds to the concerns of younger readers.

CONCERT: LAWRENCE DEAN
1:00pm | Thomas | Concert
Lawrence Dean first encountered filk at the Brighton Worldcon in 1979. He wrote his first sci-fi song, "The Ballad of Arthur Dent," in 1980 and is active in UK filk. Lawrence has written over 135 songs, nearly half of which are filk or filk-related. The rest are a mix of folk, country, and contemporary. His music has been performed and recorded by professional folksingers and fellow filkers across America, Canada, Australia, and the United Kingdom. Lawrence is the winner of the 2021 Pegasus Awards for Best Filk Song and Best Writer/Composer.

Climate Change Science, Mitigation, & Adaptation
Ted Weber
This presentation will describe the physics behind the greenhouse effect and how it is increasing temperatures and changing the climate. Then I'll discuss methods to reduce future warming and damage, and how to adapt to warming that's already occurring. Mitigation strategies include reducing greenhouse gas emissions, pulling them out of the atmosphere, and reflecting excess heat into space. Adaptation strategies include resistance, resilience, and transformation.

Feeding the sparrowhawk while the sky breathes fire
Claire McCague
In 2020, fossil-fuel CO₂ emissions temporarily dropped by 5-7% due to the COVID-19 pandemic, but atmospheric concentrations of CO₂ and methane both rose. While optimists insist we can and must invent a pathway to rapidly decrease emissions, pragmatists point at the gap between emission reduction targets and the historic pace of global energy transitions. The greenhouse gas problem is a complicated hot mess. What are we going to do about it?

HORROR AS SOCIAL COMMENTARY
7:00pm | Kress | Panel
Horror offers so much more than slasher movies and ghost stories. The importance of the horror genre across literature, film, and increasingly television can hardly be overstated as a crucial platform to explore human weakness and critique social ills—while sometimes delivering sensational scares! Join a discussion about what horror is for, and what horror can do across mediums.

SCIENCE TALK 7: NEURAL NETWORKS AND AI
7:00pm | Diplomat Ballroom | Presentation

Artificial Intelligence: Past, Present, Futures
John Ashmead
From neural nets and genetic algorithms to facial recognition and deep fakes, artificial intelligence (AI) is everywhere today. What exactly do we mean by AI? How did AI get where it is today? What role will it play in our lives? What are the benefits and risks of AI? And when will we have real AI?

Neural network attack vectors
Avani Wildani
Neural networks in the brain are sparsely connected, composed of components with an over 50% failure rate, and still amazingly consistent in their high-level behavior over time. We are building models of biologically plausible neural networks to help explain how the brain can protect against a malicious adversary while keeping networks tiny, low power, and easily trained. Using parameters taken from the somatosensory cortex, we have built a prototype simulator to show the relationships between connectivity and severity of possible attacks.

THE FUTURE IS CREATING/ STEALING YOUR JOB

**10:00am | Calvert Room | Presentation**

Two academic talks:

**SF Prototyping for Business Innovation**
*Hirotaka Osawa*

SF prototyping is a business thinking method for utilizing science fiction narrative for making innovative ideas when considering the design of future societies. The method is getting famous in the US, China, and Japan. We compared it with conventional scenario planning in 9 groups, and the results were analyzed by 14 business experts with Mitsubishi Research Institute. The results suggest that the SF prototyping approach is more provocative and fun than the scenario planning approach.

**Do Androids Dream of Taking Your Job?**
*Jesper Stage*

In the past, technological breakthroughs have often led to job losses in individual economic sectors, but average wages have usually gone up and overall employment has generally increased as well. Might things be different in the future? What might artificial intelligence and robots mean for the labor market? This talk will look at some of the real-world economics of the impacts of technological change on the labor market and compare with how we see this depicted in science fiction.

THE PUBLIC DOMAIN WE DON'T HAVE
1:00pm | 🖥 Palladian Ballroom | Panel
Entertainment industry lobbyists keep pushing copyright life further and further into the future. If copyright in the U.S. hadn't been extended in 1976 and again in 1998, many more works would now be in the public domain. Join us to discuss the fun mashups we might have had if copyright extension hadn't passed. Bring your own soapbox.

THE NEVER-ENDING STORY: SERIES FICTION
2:30pm |
Congressional Room (A&B) | Panel
Sometimes it seems as if series fiction dominates the field. Every author has a sequel in the works, trilogies become five books, ten books, and sometimes the author dies before the series ends. This panel will discuss what you can do with a series that you can't do with a standalone, the different pleasures of connected stories set in one world, and the series that is a single story.

THE SMALL PRESS TAKEOVER OF SHORT FICTION
4:00pm | Forum Room | Panel
There was a time, long ago, when short fiction had to be published in one of the "big three" magazines to get popular attention and critical acclaim. The rise of magazines like Clarkesworld, Uncanny, and Beneath Ceaseless Skies, among many others, make markets of today a much more level playing field. We’ll talk about what’s changed and why, and what it means for the state of speculative fiction.

UNUSUAL POLITICAL STRUCTURES IN SPECULATIVE FIC
4:00pm | Kress | Panel
There is excellent speculative fiction creating political structures different from the usual monarchies, republics, and despotisms. Systems like the microdemocracy in Malka Older’s *Infomocracy*, direct democracy in Alastair Reynolds’ *The Prefect*, and the take on empire in Arkady Martine’s *A Memory Called Empire* create interesting structures outside of our more usual paradigms. What makes them work, and what lessons can we learn about worldbuilding thematic and believable systems of government?

WRITING TO SPEC
4:00pm | Calvert Room | Panel
Plenty of paid writing jobs involve writing to spec—that is, writing to an assigned topic and style. From comics to licensed properties to ghostwritten novels, writing to spec can be both lucrative and frustrating. How can you find the best compromise between your artistic voice and your client’s expectations? How closely will you be expected to hew to your assignment? What goes into writing a “bible” anyway? Writers and editors who have worked for different companies share their experiences.

SUFI, ARABIC, AND ITALIAN SF
5:30pm | Old | Presentation
Three academic talks:

Sufi Science Fiction
Emad El-Din Aysha
Sufism has been deployed many times in genre works, not least SF. Sufism however is lacking in Arabic and Islamic science fiction. The situation is changing as Arab SF authors, old and young, brave this fledging subgenre. The downside is commercialization and commodification of Sufism and Islam.

Law, Economics and Arabic Science Fiction
Ahmad Al-Mahdi
World-building involves translation. There is futurespeak but also the way a world is introduced via motifs and tropes the audience can recognize, a process of familiarization analogues to translation. Linguistic translation of a work of science fiction involves another layer, a shift from one cultural-historical set of experiences to another.

The Birth of Science Fiction in Italy
Simone Pettine
This paper will discuss the first sf novel published in Italy, by Dino Buzzati in 1960: *Il grande ritratto*. Using the strategies of textual criticism, the proposal therefore aims to make to point of the influences that led to the drafting of *Il grande ritratto* of Dino Buzzati, as well as the themes that it left as a starting point for posterity.

**SCIENCE TALK 11: SPACE EXPLORATION**

10:00pm | Diplomat Ballroom | Presentation

**The Internet of Power**
*Pat Bahn*

As the fossil energy economy begins to exceed climatological reserves and a climate emergency is occurring, the potential for a new era of smart energy production can expand. Renewables driven by subsurface, surface energy allows the growth of non-variable cost structures in power generation. An era of SuperPower will produce the energy needed for true interplanetary economies.

**Mars or Bust?**
*Katie Mack*

There’s been plenty of talk about sending humans to Mars, but how feasible is it, really? What limits our ability to live on Mars right now, and what technology needs to be developed to get us there? I’ll summarize all the thorny issues of interplanetary travel and habitation, and why we might (or might not) soon be leaving footprints in the Martian dust.

**Exploring Titan**
*Geoffrey Landis*

Titan, Saturn’s moon, is the only moon in the solar system with a thick atmosphere and bodies of liquid on the surface. But on Titan, the liquid is not water, but hydrocarbons—lakes of liquid methane and ethane. This talk will discuss why Titan is important and give details on some proposals for possible future missions to Titan.

STORY STRUCTURES BESIDES THE HERO'S JOURNEY
10:00am | Older | Panel
Tell me if you've heard this one: a young, inexperienced character goes on a journey, gets tested, overcomes a great challenge, and returns home triumphant. Yeah, yeah—been there, done that! Let's explore story structures that aren't the standard three-act hero's journey.

CONSIDERING CLIMATE CHANGE IN YOUR WORLDBUILDING
11:30am | Kress | Panel
In 2016, Amitav Ghosh wrote: "Climate change is like death, no one wants to talk about it." But climate change is an unavoidable fact of the near future, which any novel set in the next century must take into account. IS THE GENRE TOO BIG FOR MEANINGFUL HUGOS?
11:30am | Blue Room | Panel
When DisCon I was held in 1963, fewer than 250 science fiction novels were published in English. In 2020, there were more speculative fiction novels published than one person could read. THE RESURRECTION OF PSYCHOLOGICAL HORROR

11:30am | Empire Ballroom | Panel

Jordan Peele's *Get Out* brought psychological horror movies to the forefront again, pulling audiences back to the quieter side of horror. But it is not new. The 70s and 80s were a slasher movie fan's dream period, but also had a fair amount of psychological horror: *The Omen*, *The Exorcist*, *Angel Heart*, and *Jacob's Ladder*, to name a few. *Bradford Lyau*
Analyzing Robert A. Heinlein in light of recent revisions of the Enlightenment and studies analyzing Heinlein works. The different, often conflicting ideological slants used to describe Heinlein's politics could be explained in part by this analysis. I will use Jonathan Israel's recent studies of the Enlightenment as the basis of this era's recent revisions.

**Taste and Longing in Asian SF**
*Annie Sheng*
Humans transform identities and histories through relationships with food in imagined futures. I draw from anthropological analysis and Asian SF stories to examine how people make meaning of their lives through food. An example is machinery, corporeality, and the desire for taste present in futures featuring humanity and the synthetic in Xia Jia, Indrapramit Das and Isabel Yap's works. From noodle stalls to fruits of the homeland, sensory-rich scenes of food are layered with analytical meaning.

A MRS. HAWKING SPINOFF, GENTLEMEN NEVER TELL
4:00pm | Palladian Ballroom | TV - Live Event
by Phoebe Roberts and Bernie Gabin
A comedic spinoff of the ongoing Hawking story, we follow Mrs. Hawking’s nephew Justin as he trots the globe having romantic adventures in the spirit of P.G. Wodehouse. While on a business trip to Venice during Masquerade, dashing bisexual rake Justin Hawking is there to make deals and make love, not necessarily in that order. But behind the masks of the ball is more intrigue than he bargained for, and Justin must interrupt his dalliances long enough to stick up for those without his privilege to float through life.

CHANGING THE FUTURE OF THE FUTURE
4:00pm | Congressional Room (A&B) | Presentation
Two academic talks:
Alt-Histories Against Technological Determinism
Laura Osur
For All Mankind (Apple TV+, 2019-) and Mary Robinette Kowal’s Lady Astronaut series (2018, 2020) present alternative histories of the space race. Read in conversation with each other and as part of a global debate around ethical technology and the commercialization of space, these two properties argue against the theory of technological determinism and for a more active, nuanced, and gendered discussion of the history and future of technological development.

Africanfuturism as Developmental Rebellion
Jenna N. Hanchey
I examine how Africanfuturism pushes back against Western visions of development through what Nyerere calls developmental rebellion. Examining the work of Nnedi Okorafor, Tade Thompson, Wanuri Kahiu, Suyi Davis Okungbowa, & Tendai Huchu, I trace four ways that Africanfuturism decolonizes development. Africanfuturism: (1) releases radical desire; (2) recreates ecological contexts; (3) uses alien technology in decolonial ways; and (4) limns alternative possibilities for life itself.

FROM GRIMM TO DISNEY AND BACK: THE CHANGING FAE
4:00pm | Blue Room | Panel
Early fairy tales tended to be very dark stories. The 1800s saw the emergence of lighter, more whimsical fairies. Walt Disney made them even more saccharine. Now we are starting to see a return to the more dangerous, untrustworthy Fae. From Grimm’s Fairy Tales to Sleeping Beauty, Jonathan Strange & Mr Norrell, and The Dresden Files, our panelists will discuss how the Fae have changed over the years.

IN PRAISE OF RANDOMNESS
4:00pm | Calvert Room | Panel
Random elements are a design tool used in many video game plots and progressions, whether it be procedurally generated enemies or quests, or large-scale reordering of the game logic. There are similar, but different, dynamics in tabletop role-playing games' use of dice and random generation tables. Why does randomness in game progression work? What are the consequences when it doesn’t? How do random plots change the way players experience agency in the game?

SCIENCE TALK 10: TELESCOPES AND RADIO WAVES

4:00pm | Diplomat Ballroom | Presentation

Black Holes for Fun and Profit
Katie Mack

Our understanding of black holes has increased dramatically, and we’ve discovered entire populations of them that defy our current best astronomical explanations. I’ll give an overview of the science of black holes and an up-to-date summary of what we’ve learned through gravitational waves, observations of the black hole in our own galaxy’s center, and the incredible effort to take a photo of a black hole in another galaxy.

Spectrum Wars - The Battle for Radio Frequencies
Keith Gremban

Radio frequency (RF) spectrum is a scarce, but infinitely renewable resource. RF spectrum is critical to our 21st century lives - in ways that often conflict with each other. Earth observation satellites are critical to everything from weather forecasting to assessing crop health. The same frequencies are also in demand for telecommunications. We will review the applications that depend on RF spectrum, review the state-of-the-art in managing RF spectrum, and present some of the mechanisms - technical and legal - that are being developed to provide fair access to radio frequencies.

WHY DO WE LOVE NOVELLAS AND NOVELETTES?
4:00pm | Cabinet Room | Panel
Novellas and novelettes are having a moment right now. What makes them effective? Is it because they can home in on a specific idea or emotional payoff in depth, that they are the perfect length for one reading session, or some other kind of magic? What are some of our favorites to read, and what is it that draws authors to write at these lengths?

SCIENCE TALK 2: TELESCOPES AND EXOPLANETS
5:30pm | Diplomat Ballroom | Presentation

Exoplanets
Padi Boyd

In 1992 the first planet orbiting a star other than our Sun was discovered. Since then, almost 5000 planets in 3600 systems have been added to our catalogue of exoplanets. We will discuss the latest findings and marvel at the variety (and new types) of worlds that exist.

Exoplanet Worldbuilding in Science Fiction
Emma Johanna Puranen

Real exoplanets were first discovered in the past few decades, but science fiction authors have been writing about worlds outside our solar system for much longer. How does the diversity of fictional exoplanets compare to real-world discoveries? How are writers influenced by science? We apply data science techniques to a database of fictional exoplanets to investigate how this current era of unprecedented exoplanet discovery has impacted the way writers worldbuild their fictional exoplanets.

The Complexities of War
Fantasy and science fiction seem to have a love affair with battles where two armies charge headlong at each other across vast plains or the immense vacuum of space for no good reason, and there is a notable absence of blood, bowels, and trauma. What are the best examples of realistic warfare? What methods can writers use to make battle sequences both interesting and reasonably true to life? How do we convey the complexities of war?

Why Won't You Stay Dead?!
Characters have come back from the dead so often in superhero comics that it’s become a running joke, sometimes cheapening the impact of the death in the story. Creators have come up with a wide variety of tricks to resurrect or otherwise return "dead" characters to life. Is it just lazy storytelling, editorial decisions driven by commercial reasons, or is it something inherent to the storytelling form and round-robin method of collaborative authorship of comics?

INSPIRED OR COPIED? THE ETHICS OF ART
10:00am | Calvert Room | Panel
Unapproved use of licensed material, traced artwork, copied costume patterns, digital manipulation—there are so many ways for artists to cross the line into unethical behavior when using another artist’s work as source material. How do we distinguish between inspiration, homage, and borderline theft? If imitation is the sincerest form of flattery, how should artists feel about seeing their work duplicated elsewhere?

KAFFEEKLATSCH WITH DOUGLAS F. DLUZEN, PHD
11:30am | Suite 325 Side Room | Kaffeeklatsch
Small group discussion with scientist/science writer/editor Douglas F. Dluzen. Advance sign up suggested
Douglas F. Dluzen

ANIME AND MANGA IN TRANSLATION
11:30am | Calvert Room | Panel
Anime and manga are frequently altered during the process of translation. Changes can range from small shifts in wording for the sake of comprehension to significant changes in plot and character. How do Western publishers and media companies decide what changes to make for their English-speaking audiences? When do these changes work well, and when do they damage the story? Are fans who don’t speak Japanese missing out?
Anime and Manga, International
Dana L. Little, Ada Palmer, Maquel A. Jacob, Peter Adrian Behravesh, Nick Mamatas

ASTEROID MINING AND THE GLOBAL ECONOMY
11:30am | Diplomat Ballroom | Panel
A single medium-sized asteroid can contain more gold and platinum than all of Earth. How do we keep the first giant hunk of space gold from crashing the world’s commodities markets? How might speculative technologies lead to creation of markets for asteroid resources?
Economics, Science
Geoffrey Landis (moderator), Peter N. Glaskowsky, Keith Gremban, Stina Leicht

CONCERT: HAROLD FELD & MARC GROSSMAN
11:30am | Cabinet Room | Concert
A pair of 30-minute concerts by Harold Feld and Marc Grossman. Both of these performers have been active in the Society for Creative Anachronism and will serenade you with everything from ancient song to futuristic filk.
Music
Harold Feld, Marc Grossman

SAILING THE SEA OF SUBMISSIONS
11:30am | Kress | Panel
What is it like for marginalized or underrepresented writers to navigate submissions and rejections in short fiction? How do such writers consider editorial feedback related to voice or relatability, when it's possible that feedback could be coming from a place of bigotry or close-mindedness rather than a reflection of their craft?
Publishing, Reviewing/Critique, Writing
LP Kindred, Phoebe Barton, K.G. Anderson, Vida Cruz, Beverly Bambury, AJ Odasso
MANIFESTATIONS OF GENDER
11:30am | Congressional Room (A&B) | Panel
Three academic talks:
Author and Character Gender in the Hugos
Jennifer Zwahr-Castro
From 2001-2020, over half of Hugo winners in this category have been women. The current study is a first step in a more nuanced understanding of gender representation among nominees in the best novel category and the central characters portrayed in those works.

Where Will it All Lead?: Gwyneth Jones’s Life
Nick Hubble
I compare Gwyneth Jones’s novel, Life, with Marie Stopes’s Love’s Adventure, the novel to which Virginia Woolf repeatedly alludes (Chloe and Olivia) in A Room of One’s Own. I examine how Jones’s novel imagines the ending “of the great project” in which Anna is free both to “like Olivia” and to run her own lab.

Gynoids, Fembots, and other Mechanized Women
Marcia D. Nichols
A mainstay of science fiction, gynoids and other mechanized women wreak havoc on the masculinist order. I will trace the history of the gynoid from her roots in 18th century science and literature into the 20th century in order to provide a feminist critique of the traditional use of the gynoid as a projection of fear.

SCIENCE FICTION MOVIES ACROSS THE WORLD
11:30am | Older | Panel
What are the best new science fiction movies across the globe? The panel will make its recommendations, and you, the audience, can add more. This is a chance to contribute to watch lists for the 2022 Hugo Awards.

International, TV & Film
Ahmed Salah Al-Mahdi, Elsa Sjunneson, Mazi Nwonwu, Terrence Francis, Nikhil Singh

SONGWRITING TIPS FROM THE PEGASUS AWARD NOMINEES
11:30am | Thomas | Workshop
The Pegasus Awards were founded by OVFF (Ohio Valley Filk Fest) to recognize and honor excellence in filking. Our panelists have all been nominated for Pegasus Awards for their songwriting. Come hear what they have to say about the art of crafting the perfect song.

Music, Writing
John G. McDaid, Benjamin Newman

THEME SONG CIRCLE B
11:30am | Forum Room | Participatory Event
A song circle with a topic to be determined. Performers and listeners welcome. The day before attendees who have moderated a song circle before can sign up to host a theme filk and to choose its topic on a first-come, first-served basis. Check the daily newsletter for information about signing up to host and what the topic will be.

PUBLIC TRANSIT & PARKING

PUBLIC TRANSIT (RECOMMENDED)

Public transit is a great option for getting to and from DisCon III!

**Metrorail:** The Omni Shoreham lies across the street from the Woodley Park Station located on Metro’s Red Line. Get a SmartTrip Card or download the SmartTrip app to use Metrorail.

**Buses:** The L1, L2, and 96 Metrobus and the DC Circulator also serve the Woodley Park Station. The DC Circulator runs later and offers $1 fares for several routes across the city.

**Bikes + Scooters:** Try a DC-area service offering shared bikes, e-bikes, and e-scooters! We’re big fans of Capital Bikeshare.

DRIVING + PARKING

**Parking at the Omni Shoreham:**

Hotel parking is $35/day, valet-only, with no in-and-out privileges for non-guests. Space is extremely limited.

If you attempt nearby street parking, please read signs carefully.

**Nearby paid lots:**

- **Colonial Parking LeadingAge Building (Lot 609) - day only**
  2300 Calvert St., NW, 20008 Washington, DC

- **Colonial Parking (Lot 462) - 24/7**
  2415 18th St NW, Washington, DC 20009

**Distant paid lots:**

There are many options to park farther away from the Omni Shoreham. Consider parking at a lot near a Red Line Metrorail Station and taking Metro to the hotel (Woodley Park Station).
NEED TO GET AROUND?

Citymapper is our favorite transport app for navigating DC.
Just enter your destination, and Citymapper will show you various transit options for getting there -- including arrival times, cost estimates, and more!
